After High School ,, WHAT NEXT?

~ ~ ~ The majority of girls graduating from our high schools would like to have more education. Every girl wants to do something worth while ∽ ∽

What About Nursing?

¶ As a nurse in training—even before graduation—a young woman can be of service to those who need her. During her course she is paying for both her instruction and her living by assisting on the wards of the hospitals.

¶ Her course of instruction includes a valuable study of the sciences upon which is based an understanding of life, of health as well as disease, and of those principles which underlie the skill she will acquire in the care of the sick.

¶ A course in nursing will make a woman a more intelligent citizen, a better wife and mother, and give her a means of earning her own living wherever and whenever she may wish.

❖

DO YOU WISH TO BE A NURSE?

Washington University

can offer you an excellent course if you meet these requirements:

What Does the Nurse Do When Not on Duty or In the Class Room?

❖

¶ The life of the student nurse is much like the life of any girl living in a college dormitory.

¶ A new ten-story addition to the Nurses' Residence has just been completed which contains class rooms, a library, reception rooms and a lounge; adequate provision is thus made for recreation.

¶ There is a Student Association, an Athletic Association and a Young Women's Christian Association.

¶ The Nurses' Residence is situated at 416 South Kingshighway, just north of the Children's Hospital and opposite Forest Park.

¶ The office of the Director of the School of Nursing is at 416 South Kingshighway.

¶ Write to the Director or call to see her for further information.
